FIRE & SECURITY LTD

## Choose from our range of services

We are constantly watching the latest fire and security technology on offer, supported by our suppliers all over the world. We then analyse, design, install, service and monitor to all the quality standards you would expect, to ensure that our customers get the local service they are familiar with, backed by the reassurance of a NSI approved company.

### Integrated systems
- combined access, CCTV & intruder alarms systems
- single system control
- virtual security presence

### Monitored Intruder Alarms
- confirmed technologies
- secure signalling

### CCTV Security
- digital & analogue
- remotely monitored
- plug & play observation systems

### Access Control
- networked & stand-alone
- face, eye & fingerprint systems
- video entry systems
- proximity cards & readers

### Fire detection & extinguish systems
- digital & analogue
- portable extinguishers for all fire classes
- commercial & residential

### Security analysis, design & testing

The effectiveness of your security system is dependent on a comprehensive security audit to fully understand the needs and risks of your workplace. We will discuss all areas of your business that may need protecting, from essential data to high value stock and provide you with a clear and detailed system design proposal. Each business has different security needs, and Watchdog is here to help you define what risks there are and how to tackle them. We listen and ask the right questions.

### Installation & training

From a simple upgrade to a fully project-managed multi-site integrated security system, Watchdog ensure a swift and hassle-free installation. This is combined with full on-site training and familiarisation of the system.

### Service & maintenance

You depend on your security system to provide safe and secure premises for your staff, visitors and stock. So it makes that your system is kept in optimum condition, with 24 hour emergency cover that you can always count on when it is needed.

### Monitoring & response

Our 24 hour central station monitoring and emergency service are available throughout the UK with Redcare option to British standards.

### Watch, We know what we're doing

Our certified engineers are highly skilled and proud of the work they are doing. They share a commitment to keeping their skills and knowledge up-to-date with technology and the changing demands of fire and security needs. We understand that the most effective security solution is largely unobtrusive but absolutely reliable when you need it the most. We know what we're doing.

### Watch, You can rely on us

Watchdog are trusted to protect the very fabric of society. Day-in and day-out our engineers serve local businesses, institutions and residential premises. We are also entrusted with the Post Office, so you'll be in good company if you rely on us.

### Watch, We are there when you need us

We know that our customers want someone who can respond quickly to their enquiries so we have dedicated customer service personnel in our monitoring centre who are available to answer you promptly 24 hours a day, 365 days a year. With engineers and emergency response officers on call to protect your business around the clock, Watchdog never sleeps.

## Free surveys & estimates

Watchdog offer a complete fire & security service with experienced consultants available to give free advice on how to make your premises secure. Our advice is entirely free of obligation and is normally available within 24 hours.

# Monitored Intruder Alarms

Intruder theft and criminal damage is a threat and cost to business. Electronic intruder detection systems can provide cost-effective protection and act as a deterrent to intruders while alerting staff and police. Our Alarm Receiving Centre is NSI approved and is recognised by all major insurance companies and Police Authorities.

Whether you need external detection, building security, or to safeguard key internal areas we have the answers you need. Our experience has shown that security systems must be individually designed, carefully installed and regularly maintained. We will assess the particular risks your premises and operations present, and build a solution around them combining proven techniques with leading edge technology.

**Benefits**

- Our approach ensures that your system is user-friendly, simple, trouble free and effective at protecting your business, employees, visitors, information and assets.
- Intruder Alarms installed to the current standards.

## Integrated systems

- Combined Access Control, CCTV & Intruder Alarms Systems
- Complete control from a single system
- 'Virtual Security Presence'

# CCTV Security

CCTV security – closed circuit television – can be used in both internal and external environments to watch over and protect people, property, vehicles and valuables. CCTV is considered to be the most effective method of reducing crime *(British Chambers of Commerce Business Crime Survey).*

We install many different types of camera systems from simple low cost fixed cameras to fully functional remote controlled speed domes, to suit all types of applications, from seeing who is outside your premises to viewing shoppers in a store.

Our experienced surveyors and system engineers will design the exact system you require using the most suitable and up to date equipment available, providing sound advice on the most cost-effective and professional solution for your specific needs.

**Benefits**

- provides instant alerts when trouble occurs
- ensures that crime against people, theft and vandalism are all substantially reduced
- when crime does occur, CCTV system incident recording can provide valuable evidence, improving the likelihood of a conviction

## Integrated systems

- Combined Access Control, CCTV & Intruder Alarms Systems
- Complete control from a single system
- 'Virtual Security Presence'

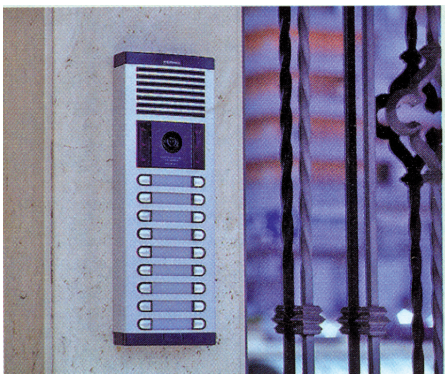
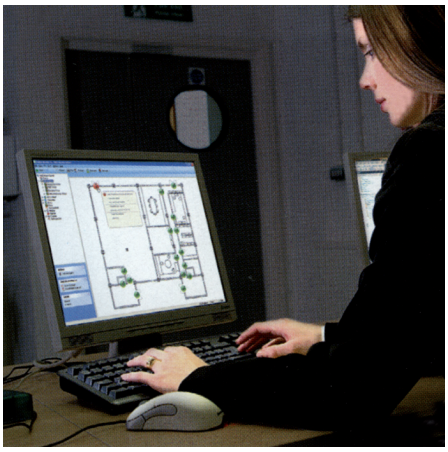
# Access Control

Access control security includes a range of technical solutions to a single problem – the need to allow the free flow of authorised people whilst denying entry to unwanted visitors. Simple 'touch-n-go' technology ensures fast convenient access to even the most regularly used entrance, while still maintaining security.





Watchdog has the experience and expertise to design and install tailor-made systems, providing solutions from single door access through to the most demanding multi-faceted environments; offices, factories, hospitals, public buildings, the retail sector, schools and colleges.

**Benefits**

- Keep unwanted people out
- Monitor personnel time keeping habits
- 'Close off' restricted areas to particular staff
- Replace and cancel lost "keys" instantly
- Control who is entering your premises; where and when
- Protect employees, visitors, property and sensitive information
- Integrate with other security systems for centralised management of the site
- Assist with car park management
- Help compliance with requirements of the Disability Discrimination Act
- Increase security with Photo ID
- Control access to a wide variety of other facilities or equipment, such as vending machines or PCs, using smartcard technology

## Integrated systems

- Combined Access Control, CCTV & Intruder Alarms Systems
- Complete control from a single system
- 'Virtual Security Presence'

# Fire detection & extinguishing

Every year thousands of people are injured by Fire and Smoke. Although there is no foolproof method to prevent this from happening, Watchdog can help make your property a safer place. We install and maintain fire alarm systems and fire extinguishers as recommended by the Fire Protection Association. All of our systems can be linked to our 24 hour alarm receiving centre to provide you and your property with a higher degree of response from your local fire brigade in the event of a fire.

Fire safety in the home and workplace is increasingly becoming a matter of great concern to many local authorities and home owners. Watchdog can supply and fit a wide range of stand-alone fire alarm systems to comply with British Standard 5839-1:2002 and European Standard EN54.

**Annual Inspection Service & Maintenance by a competent person**

In order to conform to British Standard 5306: Part 3, you should ensure that all fire extinguishers are inspected, serviced and properly maintained at least once a year.

These procedures must be carried out by a competent Watchdog engineer trained according to EEC and British Standards, who will make sure that appliances are: sited correctly, fully operational and not damaged in any way.

A maintenance record card attached to each extinguisher will be completed and signed at the time of the visit.

## Integrated systems

- Combined Access Control, CCTV & Intruder Alarms Systems
- Complete control from a single system
- 'Virtual Security Presence'

## Why should you choose Watchdog?

You are probably reading this because you have a decision to make, between entrusting your protection needs to us or another provider. Watchdog is a quality process driven provider of fire and security solutions and we understand how to manage the risks associated with doing business in the 21st century. But we also know you have a choice, so what gives Watchdog the edge?

### Watch, We speak your language

It is easy to get caught up in security jargon. Whilst security technology and security issues fascinate us, we realise that it can be confusing and frustrating if you simply want a solution to your security requirements. That is why we present you with a concise quotation in plain English: your security requirements, our recommendation, the cost and what to do next. It's as simple as that.

### Watch, We represent excellent value

Watchdog strives to offer a fair price for a professional diagnostic and solution that will give you the confidence you need. We will work with you to find a solution that works, if your budget won't stretch as far as you would like.
